CAREER SUMMARY

SDE-2
ZEE5 | Dec 2022 to present
- Contributed to the enhancement of Zee5 application pages by collaborating with the core team, leveraging Next.js for mobile and desktop platforms, resulting in improved Web Vital scores and enhanced SEO optimization.
- Proficient in a wide range of cutting-edge technologies and frameworks, including but not limited to Next.js, React, Redux, JavaScript, Tailwind CSS, React Native, TypeScript, GraphQL, Vite, and Express.

Head of Software Engineering
Konnectify | Dec 2021 to present
- Provide technical assistance to internal departments and developers
- Hands-on experience in web development (HTML, JavaScript, Typescript, AJAX, CSS, React, Rest APIs, and Express)
- Worked with various services in the Google cloud platform such as App Engine, Cloud functions, Pub/Sub, Cloud Scheduler, Firebase, VM, and so on.
- Set up CI & CD pipelines to automate tasks from development to deployment by using Azure DevOps.

Sr. Full Stack Software Developer
Arbaan | May 2019 to 2021
- Expertise and efficiency in integrating RestAPIs.
- Utilized HTML, CSS, Javascript, JQuery, React, and Express to build 30+ integration apps for Freshworks
- Mentored 6 junior developers on the team in expanding Javascript and React skilset.

PROJECTS

ZEE5
- Contributed to the enhancement of Zee5 application pages by collaborating with the core team, leveraging Next.js for mobile and desktop platforms, resulting in improved Web Vital scores and enhanced SEO optimization.
- Utilized GraphQL to facilitate the migration of all REST APIs to queries and mutations, streamlining data retrieval and manipulation processes.
- Played a key role in the ILT Season 2 team, focusing on predictive features and leaderboard implementation, integrating SSE events for real-time scorecard updates and predictions.
- Engaged in the Microsoft Hackathon, collaborating with the music studio team to explore innovative applications of Gen AI technology.
- Proficient in a wide range of cutting-edge technologies and frameworks, including but not limited to Next.js, React, Redux, Zustand, JavaScript, Tailwind CSS, React Native, TypeScript, GraphQL, Vite, and Express.

Konnectify
- Built a full-stack web application (Zapier alternative) to help users to automate their tasks from different apps in one place.
- Led the dev team to complete the product for the MVP.
- Worked in an agile environment with weekly stand-ups, kept track of user stories/bugs, and conducted 2 hours of sprint planning and sprint retrospectives per week. ·
- Pair programmed with 3 engineers, and reviewed the team's code to provide additional perspective and catch previously missed errors.
- We have used these technologies & tools to build this product such as React Js, Express Js, Typescript, Firestore for Database, Azure DevOps for CI & CD, JIRA for Project Management, and GCP for cloud hosting.
- We have built the application using microservices architecture consisting of a collection of small, autonomous services.

Freshchat
- Calendly is a public app that helps to schedule a meeting in Calendly and users can able to accept the meeting
- Zohodesk is a public app that helps agents to create tickets, contact in Zohodesk from Freshchat, and agents can able to view recent tickets.
- Salesforce sync is a public app that helps agents to view current user leads. contact, task, and opportunities details in Salesforce from Freshchat.
- Tech Stack: HTML5, CSS3, Bootstrap, JQuery, Javascript(ES6), React, Express, and so on.

Freshsales
- Acuity is a public app that helps agents to view, and create appointments for contacts & leads from Freshsales. It will create an appointment in Freshsales when a new appointment is created in Acuity
- Stripe sync is a custom app that helps to configure Stripe events to Freshsales events. It's a fully dynamic app that can able to configure any Stripe events that turn into contact, lead, deal, and so on.
- Here're some clients with whom I have built custom apps for Batchleads, Ciputra, QubeCinema, TireHub, Vahub, and so on.
- Tech Stack: HTML5, CSS3, Bootstrap, JQuery, Javascript(ES6), React, Express, and so on.

Freshdesk
- Westcon app is a custom app that helps to clone ticket properties, attachments, conversations & attachments as well.
- Atag is a custom app that helps to view customer information from Atag products. We have done this app in a short span of time.
- Tech Stack: HTML5, CSS3, Bootstrap, JQuery, Javascript(ES6), React, Redux, Express, and so on.

Zapier
- I have built a Freshcaller app that helps to make Zapier users able to connect Freshcaller with any third-party applications
- I have converted Freshsales & Freshworks apps Legacy web builder into UI platform and added new actions for these apps
- Tech Stack: Javascript(ES6) and Node Js

WordPress
- I built a Freshworks Forms Plugin in a short span which helps users can able to customize forms and use some built-in form templates for their Websites.
- Tech Stack: HTML5, CSS3, Chakra UI, Javascript(ES6), React, Redux Toolkit, Php, MySQL, and so on.
